GMT boston acoustics crc
speakers owners pdf -

Stereophonic sound or,
more commonly, stereo, is a
method of sound
reproduction that creates an
illusion of multi-directional
audible perspective. This is
usually achieved by using
two or more independent
audio channels through a
configuration of two or
more loudspeakers (or
stereo headphones) in such
a way as to create the
impression of sound heard
from various directions, as
in natural hearing.
